Specification sheet

Diesel Generator set
QSB7 series engine
100-200 kW 60 Hz

Description
Cummins Power Generation commercial generator sets are fully integrated power generation systems providing optimum performance, reliability and versatility for stationary standby and prime power applications.

Features

**Cummins® heavy-duty engine** - Rugged 4-cycle, industrial diesel delivers reliable power, low emissions and fast response to load changes.

**Alternator** - Several alternator sizes offer selectable motor starting capability with low reactance 2/3 pitch windings, low waveform distortion with non-linear loads and fault clearing short-circuit capability.

**Control system** - The PowerCommand® 1.1 electronic control is standard equipment and provides total genset system integration including automatic remote starting/stopping, precise frequency and voltage regulation, alarm and status message display, output metering, auto-shutdown at fault detection and NFPA 110 Level 1 compliance. The optional PowerCommand 2.2 control is UL 508 Listed and provides AmpSentry™ protection.

**Cooling system** - Standard integral set-mounted radiator system, designed and tested for rated ambient temperatures, simplifies facility design requirements for rejected heat.

**Enclosures** - Optional weather protective and sound attenuated enclosures are available.

**NFPA** - The genset accepts full rated load in a single step in accordance with NFPA 110 for Level 1 systems.

**Warranty and service** - Backed by a comprehensive warranty and worldwide distributor network.

**Engine specifications**

- **Bore**: 107 mm (4.21 in)
- **Stroke**: 124.0 mm (4.88 in)
- **Displacement**: 6.69 L (408 in³)
- **Configuration**: Cast iron, in-line, 6 cylinder
- **Battery capacity**: 1100 amps minimum at ambient temperature of -18 °C to 0 °C (0 °F to 32 °F)
- **Starting voltage**: 12 volt, negative ground
- **Fuel system**: Direct injection: number 2 diesel fuel, fuel filter, automatic electric fuel shutoff
- **Fuel filter**: Single element, 10 micron filtration, spin-on filter with water separator
- **Air cleaner type**: Dry replaceable element
- **Lube oil filter type(s)**: Spin-on, full flow
- **Standard cooling system**: High ambient radiator

**Alternator specifications**

- **Design**: Brushless, 4 pole, drip proof, revolving field
- **Stator**: 2/3 pitch
- **Rotor**: Single bearing, flexible discs
- **Insulation system**: Class H
- **Standard temperature rise**: 150 °C standby at 40 °C ambient
- **Exciter type**: Torque match (shunt) standard, PMG optional
- **Phase rotation**: A (U), B (V), C (W)
- **Alternator cooling**: Direct drive centrifugal blower fan
- **AC waveform total harmonic distortion**: < 5% no load to full linear load, < 3% for any single harmonic
- **Telephone influence factor (TIF)**: < 50 per NEMA MG1-22.43
- **Telephone harmonic factor (THF)**: < 3

Control system PowerCommand 1.1

PowerCommand control is an integrated generator set control system providing voltage regulation, engine protection, operator interface and isochronous governing (optional). Major features include:
- Battery monitoring and testing features and smart starting control system.
- Standard PCCNet interface to devices such as remote annunciator for NFPA 110 applications.
- Control boards potted for environmental protection.
- Control suitable for operation in ambient temperatures from -40 °C to +70 °C (-40 °F to +158 °F) and altitudes to 5000 meters (13,000 feet).
- Prototype tested; UL, CSA, and CE compliant.
- InPower™ PC-based service tool available for detailed diagnostics.

Operator/display panel
- Manual off switch
- Alpha-numeric display with pushbutton access for viewing engine and alternator data and providing setup, controls and adjustments (English or international symbols)
- LED lamps indicating genset running, not in auto, common warning, common shutdown, manual run mode and remote start
- Suitable for operation in ambient temperatures from -20 °C to +70 °C
- Bargraph display (optional)

AC protection
- Over current warning and shutdown
- Over and under voltage shutdown
- Over and under frequency shutdown
- Over excitation (loss of sensing) fault
- Field overload

Engine protection
- Overspeed shutdown
- Low oil pressure warning and shutdown
- High coolant temperature warning and shutdown
- Low coolant level warning or shutdown
- Low coolant temperature warning
- High, low and weak battery voltage warning
- Fail to start (overcrank) shutdown
- Fail to crank shutdown
- Redundant start disconnect
- Cranking lockout
- Sensor failure indication
- Low fuel level warning or shutdown
- Fuel-in-rupture-basin warning or shutdown

Alternator data
- Line-to-line and line-to-neutral AC volts
- 3-phase AC current
- Frequency
- Total kVA

Engine data
- DC voltage
- Lube oil pressure
- Coolant temperature
- Engine speed

Other data
- Genset model data
- Start attempts, starts, running hours
- Fault history
- RS485 Modbus® interface
- Data logging and fault simulation (requires InPower service tool)

Digital governing (optional)
- Integrated digital electronic isochronous governor
- Temperature dynamic governing

Digital voltage regulation
- Integrated digital electronic voltage regulator
- 2-phase line-to-line sensing
- Configurable torque matching

Control functions
- Time delay start and cooldown
- Cycle cranking
- PCCNet interface
- (2) Configurable inputs
- (2) Configurable outputs
- Remote emergency stop
- Glow plug control (some models)

Options
- Auxiliary output relays (2)
- 120/240 V, 100 W anti-condensation heater
- Remote annunciator with (3) configurable inputs and (4) configurable outputs
- PMG alternator excitation
- PowerCommand iWatch web server for remote monitoring and alarm notification (loose)
- Auxiliary, configurable signal inputs (8) and configurable relay outputs (8)
- Digital governing
- AC output analog meters (bargraph)
  - Color-coded graphical display of:
    - 3-phase AC voltage
    - 3-phase current
    - Frequency
    - kVA
- Remote operator panel
- PowerCommand 2.2 control with AmpSentry protection

For further detail see document S-1531.
### Ratings definitions

**Emergency standby power (ESP):**
Applicable for supplying power to varying electrical load for the duration of power interruption of a reliable utility source. Emergency Standby Power (ESP) is in accordance with ISO 8528. Fuel Stop power in accordance with ISO 3046, AS 2789, DIN 6271 and BS 5514.

**Limited-time running power (LTP):**
Applicable for supplying power to a constant electrical load for limited hours. Limited Time Running Power (LTP) is in accordance with ISO 8528.

**Prime power (PRP):**
Applicable for supplying power to varying electrical load for unlimited hours. Prime Power (PRP) is in accordance with ISO 8528. Ten percent overload capability is available in accordance with ISO 3046, AS 2789, DIN 6271 and BS 5514.

**Base load (continuous) power (COP):**
Applicable for supplying power continuously to a constant electrical load for unlimited hours. Continuous Power (COP) in accordance with ISO 8528, ISO 3046, AS 2789, DIN 6271 and BS 5514.

<tr>
<td>UL2200</td>
<td>The generator set is available listed to UL 2200.</td>
</tr>
<tr>
<td>CSA</td>
<td>All low voltage models are certified to CSA C22.2 No.100 and CSA C22.2 No.14.</td>
</tr>
</tbody>
</table>

* Note: Weights represent a set with standard features. See outline drawings for weights of other configurations.

---

**Warning:** Back feed to a utility system can cause electrocution and/or property damage. Do not connect to any building's electrical system except through an approved device or after building main switch is open.
