Natural gas generator set
QSV91 series engine
1540 kW - 2000 kW

Description
Cummins® lean burn gas generator sets are fully integrated power generation systems utilizing state of the art technology that results in optimum performance and efficient use of fuel for standby and continuous duty, CHP and peaking applications.

Features
Cummins® heavy-duty engine – Rugged 4-cycle lean burn gas combustion engine utilizing full authority electronic engine management and monitoring.

Exhaust emissions – Lean burn technology provides exhaust emissions levels as low as 250 mg/Nm³ (0.5 g/hp-hr) NOₓ.

Fuel Flexibility - Ability to run on natural gas as well as alternative gaseous fuels with lower BTU properties and varying Methane Numbers (MN).

Permanent magnet generator (PMG) – Offers enhanced motor starting and fault clearing short circuit capability.

Alternator – Several alternator sizes offer selectable voltage and temperature rise with low reactance 2/3 pitch windings; low waveform distortion with non-linear loads, fault clearing short-circuit capability, class F or H insulation (see Alternator Data Sheet for details), bearing and stator RTDs and anti-condensation heater. Mechanically strengthened for use on utility paralleling with unreliable grid.

Control system – The PowerCommand 3.3 generator set control is standard equipment and provides total genset system integration including full paralleling capability in grid or load share mode, precise frequency and voltage regulation, alarm and status message display, AmpSentry™ protection, output metering, auto-shutdown at fault detection and a user interface panel installed onto the genset. Optional grid code compliant controls systems and remote operator panels are also available on select models.

Cooling system – The generator set is equipped with the capability of interfacing with a remote radiator or heat exchanger.

Warranty and service – Backed by a comprehensive warranty and worldwide distributor network that can provide all levels of service from replacements parts to performance guarantee programs.

* Genset is capable of operating between 0.8 lagging and 1.0 power factor unless specified otherwise. All fuel consumption and heat balance data is at 1.0 power factor.
Generator set specifications

Governor regulation class  
ISO 8528 Part 5, Class G1 with exceptions – consult factory for details

Voltage regulation, no load to full load  ± 0.5%
Random voltage variation  ± 0.5%
Frequency regulation  Isochronous
Random frequency variation  ± 0.25%
Radio frequency emissions compliance  IEC 801.2 through IEC 801.5; MIL STD 461C, Part 9
Single step load pickup  Generator set configuration dependent – consult factory for details

Engine specifications

Design  
4 cycle, V-block, turbocharged low temperature aftercooled
Bore  
180 mm (7.09 in)
Stroke  
200 mm (7.87 in)
Displacement  
91.6 liters (5590 in3)
Cylinder block  
Cast iron, V18
Battery charging alternator  
None
Starting voltage  
24 volt negative ground
Fuel system  
Lean burn
Ignition system  
Individual coil on plug
Air cleaner type  
Dry replaceable element
Lube oil filter type(s)  
Full flow and bypass filters
Breather  
Breather filter

Alternator specifications

Design  
Brushless, 4 pole, revolving field
Stator  
2/3 pitch
Rotor  
Two bearing
Insulation system  
Class F or H see ADS (Alternator Data Sheet) for details
Standard temperature rise  
105 °C (221 °F) Continuous @ 40 °C (104 °F) ambient
Exciter type  
PMG (Permanent Magnet Generator)
Phase rotation  
A (U), B (V), C (W)
Alternator cooling  
Direct drive centrifugal blower fan
AC waveform total harmonic distortion  
< 5% no load to full linear load, < 3% for any single harmonic
Telephone influence factor (TIF)  
< 50 per NEMA MG1-22.43
Telephone harmonic factor (THF)  
< 3

Available voltages

60 Hz Three phase line–neutral/line-line  
• 220/380  • 240/416  • 2400/4160
• 254/440  • 7200/12470  • 7620/13200  • 7970/13800
50 Hz Three phase line–neutral/line-line  
• 220/380  • 230/400  • 240/415
• 1905/3300  • 3640/6300  • 3810/6600
• 6060/10500  • 6350/11000  • 7620/13200

Note: Some voltages may not be available on all models. Consult factory for availability.

Generator set options and accessories

Engine  
☐ NOx 250 mg/Nm³ (0.5 g/hp-hr)
☐ NO, 350 mg/Nm³ (0.9 g/hp-hr)
☐ NO, 500 mg/Nm³ (1.2 g/hp-hr)
☐ Natural gas fuel methane index as low as 40 for some models
☐ High temperature cooling circuit outlet up to 110 °C (230 °F) for some models
☐ Air starter
☐ Low BTU Gas

Alternator  
☐ 80 °C (176 °F) rise alternator
☐ 105 °C (221 °F) rise alternator

Generator set  
☐ CE Certification
☐ Grid code compliant

Control Panel  
☐ Remote operator panel with HMI320
☐ Remote operator panel with AGI 110-2

Accessories  
☐ Exhaust silencers
☐ Gas train
☐ Radiators
☐ Bladder expansion tank
☐ Heat exchanger
☐ Exhaust heat recovery

Note: Some options may not be available on all models - consult factory for availability.
Base load (continuous) power (COP) definition
Applicable for supplying power continuously to a constant load up to the full output rating for unlimited hours. No sustained overload capability is available for this rating. Consult authorized distributor for rating. (Equivalent to Continuous Power in accordance with ISO 8528, ISO 3046, AS2789, DIN 6271, and BS 5514).

Codes and standards

This generator set is designed in facilities certified to ISO 9001 and manufactured in facilities certified to ISO 9001 or ISO 9002.

The Prototype Test Support (PTS) program verifies the performance integrity of the generator set design.

This generator set complies with all relevant essential requirements; health and safety or environmental, laid down in the applicable directive(s).

Generator set configurations compliant with European Grid Codes were validated in coordination with GL. Certified product available where required.

Warning: Back feed to a utility system can cause electrocution and/or property damage. Do not connect to any building’s electrical system except through an approved device or after building main switch is open.
